* 2019 Preliminary Forecast: This estimate of HEPI is calculated by inserting into the model a combination of actual new data points, where they have become available, and forecasts of the remaining data points based upon historical information. Numbers in blue are updated monthly.

IMPORTANT NOTE: Two of the main HEPI cost factors, faculty salaries and fringe benefits, are derived from faculty compensation data published by the American Association of University Professors (AAUP), which in FY2016 began using a new methodology that was not directly comparable with the past. Due to this change in methodology, in the two previous years' reports we have used what we believe are reasonable estimates for changes in faculty salaries and fringe benefits to aid in the transition from FY2015 to subsequent years. Since then, AAUP reverted back to the pre 2016 methodology and we were able to recalculate those numbers for the past few years using that methodology. For the 2019 HEPI estimate, the numbers reflected in blue are the revised calculations.
